

CASH DATA REFERENTIAL (0353) 2ND VACATION (MORNING VACATION) FILE DESCRIPTION

1 Cash Data Referential (0353) – 2nd Vacation (Morning Vacation)

1.1 Header Description

Name	Position	Comment
Record type	1-5	Type of the record. Value 00000
File type	6-20	X(1) : environment (H/P) H : Homologation P : Production X(4) : 'FILE' X(2) : file mnemonic ('CD') X(2) : vacation (02) X(3) : market ('CAS') N(3) : Number of the day in the year
Datetime creation	21-34	Date and time of the creation of the file. Format YYYYMMDDHHMMSS
Business date (1)	35-42	Format YYYYMMDD
Filler	43-256	X(214)

1.1.1 Description of Data

(1) Business date

Definition

Date on which a clearing cycle takes place.

1.2 Footer Description

Name	Position	Comment
Record type	1-5	Type of the record. Value 99999
File type	6-15	X(1) : environment (H/P) H : Homologation P : Production X(4) : 'FILE' X(2) : file mnemonic ('CD') X(3) : market ('CAS')
Line counter	16-30	N(15) : Number of line in the file. Ex : '000000000001234'
Filler	31-256	X(226)

1.3 Body Description

Name	Position	Comment
Instrument characteristic (1)	1-1	Always '1'
Market feed indicator (2)	2-3	X(2)
Exchange code (3)	4-6	X(3)
Financial market code (4)	7-9	X(3)
Group code for the instrument (5)	10-11	X(2)
Long instrument code (6)	12-23	X(12)
Instrument mnemonic code (7)	24-28	X(5)
Event date (8)	29-36	YYYYMMDD
Event time (9)	37-42	HHMMSS
Message type code (10)	43-46	'0353'
Sequence number by instrument and message type code (11)	47-52	N(6) (ex : '000214')
Instrument name (12)	53-70	X(18)
Last adjusted and super adjusted closing price (13)	71-80	X(1) N(9)
Type of market admission of an instrument (14)	81-81	X(1)
Code for country issuer (15)	82-84	X(3)
Trading currency code (16)	85-87	X(3)
Type of unit of expression for instrument price (17)	88-88	N(1)
Filler	89-93	X(5)
Short instrument ID (18)	94-99	N(6)
Code for broad instrument category (19)	100-100	X(1)
Type of market management (20)	101-101	N(1)
Number for section (21)		
Number for section of Official List	102-102	N(1)
Number for heading in Official List	103-105	N(3)
Market place ID for instrument (22)	106-108	N(3)
Instrument group ID (23)	109-110	X(2)
Amount of capital traded previous day on instrument (with 2 decimals) (24)	111-123	N(13)
Filler	124-126	X(3)

Name	Position	Comment
Type of relationship of instrument to an index (25)	127-130	X(1) * 4
Filler	131-131	X(1)
ISIN Code (26)	132-143	X(12)
Type of derivative for a given instrument (27)	144-144	X(1)
Type of instrument (28)	145-147	N(3)
Filler	148-155	X(8)
Code for special tax treatment for equity savings plan (29)	156-156	N(1)
Date of last price (30)	157-164	YYYYMMDD
Long ID for the underlying instrument of lending/borrowing contracts (31)	165-176	X(12)
Amount of par value for instrument for lending/borrowing contracts (32)	177-189	X(1) N(12)
Number of shares or bonds issued (33)	190-200	N(11)
Quantity of shares/bonds traded on previous day (34)	201-209	N(9)
Indicator for instrument in the SRD deferred settlement system (35)	210-210	X(1)
Expiration date for lending/borrowing contract (36)	211-218	YYYYMMDD
Instrument lot size (37)	219-231	X(1) N(12)
Filler	232-236	X(5)
First possible settlement date for instrument (38)	237-244	YYYYMMDD
FTSE ID for Economic sub-sector for Issuing Company (39)	245-247	X(3)
ICB ID for Economic sub-sector of the issuing company (40)	248-251	X(4)
Bank Identification Code (BIC) of depository/settlement system for instrument (41)	252-262	X(11)
Market Identification Code (MIC) of the listed security (42)	263-266	X(4)
Long ID of the underlying instrument of a warrant (43)	267-278	X(12)
Fininfo ID for depository/settlement system for listed instrument (table) (5x) (44)	279-303	X(5)*5
Fininfo ID for main depository/settlement system for listed instrument (45)	304-308	X(5)
Type of corporate event causing order book purges (46)	309-310	X(2)

1.3.1 Description of Data

(1) Instrument characteristic

Definition

This data item indicates the description of the header functional coming from the terrestrial broadcasting.

Permitted Values

Always '1'.

(2) Market feed indicator

Definition

Gives the market dataflow to which a given instrument belongs.

Permitted Values

* Instruments listed in Paris:

00 : Miscellaneous or not provided

01 : SBF-Parisbourse, stocks in the CAC40 that are underlying equities for options + indices calculated by SBF.

02 : SBF-Parisbourse, stocks in the CAC 40 that are not underlyings for options.

05 : SBF-Parisbourse, cash settlement equities that are not part of the CAC40, but that are underlying equities for options.

06 : SBF-Parisbourse, cash settlement equities that are not part of the CAC40, and that are not underlyings for options.

07 : SBF-Parisbourse, bonds.

10 : OTC instruments

11 : IPOs being processed by SHIVA

12 : Gold instruments

13 : Foreign currencies

15 : Securities lending market instruments

Codes that are now obsolete but present in the historical databases:

03 : SBF-Parisbourse, Monthly Settlement stocks that are not part of the CAC40 but which are underlyings for options.

04 : SBF-Parisbourse, Monthly Settlement stocks that are not part of the CAC40 and are not underlyings for options.

08 : Nouveau Marché instruments

09 : EUROCAC

14: Instruments on the Carryover market (negotiation of shares and money)

61 : foreign equities that are not listed in Paris, but that are underlying instruments for MONEP options.

* Instruments listed in Brussels

20 : Stocks listed in Brussels

21 : Bonds listed in Brussels

22 : Stocks belonging to Brussels indices

23 : Warrants listed in Brussels

* Instruments listed in Amsterdam:

16 : instruments of the non regulated market of Amsterdam

30 : Stocks listed in Amsterdam

31 : Bonds listed in Amsterdam

32 : Stocks belonging to Amsterdam indices

33 : Warrants listed in Amsterdam

* Instruments listed in Lisbon

40 : Stocks listed in Lisbon

- 41 : Bonds listed in Lisbon
- 42 : Stocks belonging to Lisbon indices
- 43 : Warrants listed in Lisbon

- * Miscellaneous
 - 60 : ETF-type instruments (ETF = exchange traded funds) and related Mutual Funds (net asset values)
 - 62: NextWeather indices

- * European indices
 - 70 : STOXX indices

- * Messages of EuroNm flow
 - 74 : EuroNm messages

- * Instruments listed in Bourse du Luxembourg
 - 50 : Stocks listed in Luxembourg
 - 51 : Non Corporate Bonds listed in Luxembourg
 - 52 : Corporate Bonds listed in Luxembourg
 - 57 : Stocks listed in Luxembourg

(3) Exchange code

Definition

Place where the instrument's price, or the valuation of the instrument's price, is established:

- geographic location of the market on which the instrument is traded.
- geographic location of the instruments that make up an index.
- trading organisms: market maker.
- information sources: newspapers in which indexes are calculated and organizations that value mutual funds.
- regroupes instruments that are not traded or are due to trade.
- regroupes French instruments (such as mutual funds) for which no value is performed on the central market.
- untraded instruments that are still active for settling trades.
- French regional delegations (part of Euronext NV) responsible for handling IPOs from their region.

These codes are assigned by the company FININFO.

Permitted Values

- 000 : Not provided
- main codes used in Euronext / LCHClearnet's Information System
 - 006 : Brussels
 - 025 : Paris
 - 027 : Lyon
 - 028 : Marseille
 - 029 : Nancy
 - 030 : Bordeaux
 - 031 : Nantes
 - 032 : Lille
 - 038 : Amsterdam Cash Instruments
 - 047 : Luxembourg Cash Instruments
 - 051 : Lisbon
 - 260 : non-Euronext instrument - prices of French origin
 - 261 : instruments awaiting to be traded on NSC

(4) Financial market code

Definition

Identifies the financial market on which the instrument concerned is traded.

A Financial Market is a subdivision of the instrument list of a market operator, such as Euronext NV, which corresponds to a subset of instruments that have one or more common major management rules.

Permitted Values

025 : Paris - cash instruments (regulated and non-regulated markets)

277 : Paris - Marché des prêts-emprunts de titres

278 : Brussels - cash instruments

279 : Amsterdam - cash instruments

290 : Lisbon - cash instruments

295 : Luxembourg - cash instruments

300 : MNR (marché non réglementé - non regulated market)

Obsolete values, that can still be found in the historical data bases:

270 : Paris - Nouveau marché

271 : Eurocac

272 : Marché libre OTC

273 : Marché des reports, débat des valeurs

275 : Marché des reports, débat de l'argent

(5) Group code for the instrument

Definition

- For instruments listed in NSC: Designates the NSC group of instruments to which the instrument belongs. (Instruments that are traded by the NSC central trading system can be organized into subsets called groups. Each of these subsets includes instruments that obey the same rules, such as the trading timetable and authorized price fluctuation).

- The other instruments are grouped according to different, heterogeneous criteria, such as indices calculated by Euronext (group '8I'), Dutch instruments whose listing in NSC is pending (group 'AX'), etc.

- Extracted from the FININFO PGD-DST data flow.

Permitted Values

zeroes if not provided.

(6) Long instrument code

Definition

In the case of Euronext's cash instruments, this is either the genuine ISIN for the instrument, or a code assigned by Euronext as described below.

Permitted Values

* Zeroes if not provided.

* Euronext or Bourse du Luxembourg cash instruments:

- for single listings (i.e. instruments listed only in one Euronext market place or for the Luxembourg Market): true ISIN code.
- for multiple listings:

.. Amsterdam-listed instrument: 'NSCNL' + 1 to 5 zero characters + the 1 to 5 characters of the Amsterdam mnemonic + one-digit control key, or the ISIN code if the issuer is Dutch.

.. Brussels- listed instrument: 'NSCBE' + 1 to 5 zero characters + the 1 to 5 characters of the Brussels mnemonic + one-digit control key, or the ISIN code if the issuer is Belgian.

.. Paris- listed instrument: 'NSCFR' + 1 to 5 zero characters + the 1 to 5 characters of the Paris mnemonic + one-digit control key, or the ISIN code if the issuer is French.

Note 1: Amsterdam-listed instruments and Brussels-listed instruments that existed before the abandonment of the AFC-code (June 2003) retain the Long Id that they had at that time. This Id is built on the basis of the former-AFC code (for example 'NSCBE' + 6-digit AFC code + one-digit control key for the Belgian listing of a multi-listed instrument).

Note 2: The one-digit control key is calculated according to the algorithm specified by the ISO 6166 norm (ISIN).

.. Luxembourg -listed instrument: 'NSCLU' + from 1 to 5 zero characters + the 1 to 5 characters of the Luxembourg mnemonic + one-digit control key, or the ISIN code of the instrument if the issuer is from Luxembourg

(7) Instrument mnemonic code

Definition

The mnemonic code is attributed by the company that runs the exchange to identify a listed security. This code is principally used by traders (physical people). Depending on the company that runs the exchange, all or some listed securities have a mnemonic code.

Identifies listed securities

Since the switchover to the ISIN code and the discontinuation of the AFC code, this data item is used to build the Long Instrument ID of cash instruments listed on more than one Euronext's market place.

- Provides a means for gaining access to an instrument for certain manipulations

Permitted Values

Spaces if not provided.

(8) Event date

Definition

Date of message generation by the trading system.

Permitted Values

YYYYMMDD format.

(9) Event time

Definition

Time of message generation by the trading system.

Permitted values

HHMMSS format.

(10) Message type code

Definition

Defines the meaning and the structure of the message body .

Permitted Values

Always '0353'.

(11) Sequence number by instrument and message type code

Definition

The meaning of this item depends on the instrument and the message type that sent the message.

(12) Instrument name

Definition

Short text description of a cash instrument.

This name is managed by FININFO.

The item is calculated by IVAL.

(13) Last adjusted and super adjusted closing price

Definition

Last traded price of the previous trading day, after application of the adjustment coefficient.

Contains only prices which have actually been traded

(14) Type of market admission of an instrument

Definition

Designates the type of market to which a Euronext listed security has been admitted

Comes from the FININFO PGD/DST data flow.

Permitted Values

A : instruments traded on the primary market

B : instruments traded on the secondary market

C : instruments traded on the New Market

D : Non regulated market / instruments traded on the free market (Marché libre DTC for Paris)

E : Non regulated market / Alternext

F : non listed

G : Regulated Market / Non equities

H : Regulated Market / Equities / Segment A

I : Regulated Market / Equities / Segment B

J : Regulated Market / Equities / Segment C

K : Regulated Market / All securities / Special Segment

L : Regulated Market / Equities / Other instruments

S : OPCVM, SICOMI non listed (French Investment Funds)
6 : Off Market
7 : gold, currencies, and indexes of Euronext
9 : foreign

(15) Code for country issuer

Definition

Provides the ISO3A code for the country of location for the corporate headquarters of the company that issued the instrument. The term country code is synonymous with the nationality of the issuer in certain screen displays. Comes from the FININFO PGD/DST data flow.

Permitted Values

See appendix § 2.4.1

(16) Trading currency code

Definition

Code of the currency in which the stock is traded. If the price of a stock is quoted as a percentage of the nominal value, this field contains the currency in which the nominal value is traded.

Permitted Values

See appendix § 2.4.2

(17) Type of unit of expression for instrument price

Definition

The unit in which the stock price is quoted.
Indicates the type of units that are used to express the price of an instrument for orders and trades

Permitted Values

1 : in units.
2 : as a % of nominal.
5 : as a % of nominal, accrued interest included.
8 : in kilograms.
9 : in ounces.

(18) Short Instrument ID

(This is the new name of "Sicovam Code")

Definition

For a Euronext cash instrument (equity, index, ...), this data item is not provided and takes the constant value 000000 (after the ISIN switchover).

(19) Code for broad instrument category

Definition

This code is one characteristic of a given instrument and provides the broad instrument category : stock, bond or other .

Permitted Values

A : Stock.
D : Bond.
O : Other.
W : Warrant and Certificate
.T : Tracker

(20) Type of market management

Definition

- Indicates the market regulations governing the market on which the stock is traded.
- These rules are grouped into types according to identical processing.
- Several markets (i.e. Second Marché and Cash) can belong to the same type.
- Defines the processing system applicable to the trading of the stock.

Permitted Values

1 : Cash.
0 : Not used.
9 : Not defined.

(21) Number for section

Number for section of Official List.

Number for heading in Official List (including the subheading number).

Definition

Gives the section, heading and sub-headings in which the instrument figures in the "Bulletin de la Cote Officielle".
Allows the selection of instruments according to "La Cote Officielle (CO)".
Allows the selection of instruments by heading for a given section.

Permitted Values (Number for section) :

0 : French national funds and treasury bonds.
1 : Bonds, warrants, public and semi-public sector.
2 : Bonds, warrants, French common bond funds.
3 : French domestic equities and odd lots (cash).
4 : Other securities in French francs (cash), and international issues.
5 : Foreign securities (cash).
6 : Monthly settlement securities.
7 : Second Market.
8 : Hors Cote and Eurocac.
9 : Miscellaneous (gold, foreign exchange, indexes...).

(22) Market place ID for instrument

Definition

Place where the instrument's price or the valuation of the instrument's price in the broad sense is established:

- geographic location of the market on which the instrument is traded.
- geographic location of the instruments that make up an index.
- trading organisms: market maker.

- information sources: newspapers in which indices are calculated and organizations that value mutual funds
- regroups instruments that are not traded or are due to trade.
- regroups French instruments (such as mutual funds) for which no valorization is performed on the central market.
- untraded instruments that are still active for settling trades.
- French regional delegations (part of Euronext NV) responsible for handling IPOs from their region.

Permitted Values

The main codes used in Euronext / Clearnet's Information System are :

006 : Brussels
 025 : Paris
 027 : Lyon
 028 : Marseille
 029 : Nancy
 030 : Bordeaux
 031 : Nantes
 032 : Lille
 038 : Amsterdam
 047 : Luxembourg
 051 : Lisbon

(23) Instrument group ID

Definition

Designates the NSC group of instruments to which an instrument belongs.

All the instruments of a same NSC instrument group Id. obey the same rules such as the trading timetable and authorized price fluctuation.

Permitted Values

Each message concerns a group of instruments, which is identified by a code : ST for put and call options, AC for equities in general, OB for bonds in general, or one of the NSC-VE stock groups.

(24) Amount of capital traded previous day on instrument (with 2 decimals)

Definition

Cumulative capital traded for all previous day trades on an instrument.

Zero for Luxembourg Cash market (not available data)

(25) Type of relationship of instrument to an index

Definition

- Only used for French indexes

- Indicates whether an instrument is an index calculated by Euronext Paris SA or whether it belongs to a sample of one of the indexes.

- If the instrument is an index, this data item indicates the type of index concerned. This can be : CAC40, SBF120, SBF250, or a sector index that is a subset of the SBF250.

Permitted Values

- Characters 1 to 4 '' Stock is not a component of indexes.
- 1st character I CAC40 index.

E component stock of CAC40 index.
 '' (space) not a CAC component.
 • 2nd character 3 component stock of MIDCAC index.
 '' (space) not a MIDCAC component.
 • 3rd character 4 component stock of Second Marché index.
 '' (space) not a Second Marché component.
 • 4th character 0 stock is not a component of SBF indices.
 1 component stock of SBF120, not CAC40.
 2 component stock of SBF250, not SBF120.
 A SBF80 index.
 B SBF120 index.
 C SBF250 index.
 D sector-related index.
 F MIDCAC index.
 G Second Marché index.
 H SBF-FCI index
 J IT.CAC / IT.CAC 50
 K Marché libre index
 '' (space) component stock of CAC40 index.

(26) ISIN Code

Definition

Identifies an instrument by its ISIN (International Securities Identification Number) code, which is defined according to the ISO 6166 norm.

Permitted Values

The ISIN code is composed of:

- a two-character prefix that consists of the alpha-2 country code. The country is that which is responsible for the domestic coding, which is, in general, the country where the issuing company is based.
- a domestic code that comprises 9 alphanumeric characters.
- a one-digit control key for which the algorithm is specified by the ISO norm.

(27) Type of derivative for a given instrument

Definition

This item indicates the type of derivative product that may be related to an instrument, for example MATIF or MONEP.

Used to determine the groups and sub-groups for RLC broadcasting for a given instrument.

Permitted Values

- 1: Support of a tracker (VLI)
- 2: Complementary exchange
- 4: Underlying of a MONEP short term instrument
- 5: MATIF deposit
- 6: Underlying of a MONEP long term instrument
- 9: None

(28) Type of instrument

Definition

Groups together stocks to which the same data transmission systems, general handling conditions and SICOVAM accounting systems apply, and conferring the same rights on shareholders: voting rights, dividends, subscription rights...

Permitted Values

See appendix §2.4.3

(29) Code for special tax treatment for equity savings plan

Definition

Tax deduction code (for stock market investments) to which the stock belongs.

For example : indicates whether the stock comes under the 1978 « loi de finances » concerning the non-taxation of revenue invested in shares (called the Monory Law) and, by extension, the 1982 « loi de finances » (CEA), or whether the stock can belong to a stock savings plan (PEA).

Permitted Values

0 : The stock has never been a « Monory » stock

1 : Monory or CEA

2 : Monory or CEA

3 : PEA

4 : Monory or CEA

(30) Date of last price

Definition

Represents the last known date that an instrument traded or that a price for an instrument was estimated, not including the current trading day.

Corresponds to the date of the most recent closing level for an index if the message concerns an index.

Permitted Values

YYYYMMDD format.

Present from the day following the first quotation of the stock.

(31) Long ID for the underlying instrument of lending/borrowing contracts

Definition

Identifies by its long ID (12-character format) the listed security used as the underlying instrument (for lending/borrowing contracts) on a given instrument on the central securities lending market.

(32) Amount of par value for instrument for calculating trade amount

Definition

Represents the amount of par value of an instrument that is paid up or that is still to be amortized, which is used for calculating an amount for a trade. This amount is also called the market par value of the instrument or the smallest denomination or also the facial value.

It is calculated from the amount of par value that is paid up or that has been amortized, from the type of par value, and from the indicator for the par value that is paid up or that has been amortized.

For bonds quoted in % in Amsterdam, Brussels and Lisbon this data must be considered with the lot size.

Permitted Values

Used for the purpose of portfolio valuations.
Must be less than or equal to the total amount of the security's nominal value.

Specifics rules for Bonds quoted in % :

For Paris this data is equal to the market par value (market nominal)

For Amsterdam, Brussels and Lisbon this data is equal to 1.

Amsterdam : lot size x amount of par value = initial par value (initial nominal)

Brussels : lot size x amount of par value = market par value (market nominal)

Lisbon : lot size x amount of par value = a multiple of the market par value by 1, 10, 100, 1000 or 10000, depending on the number of decimals of the market par value (only 4 decimals are managed).

(33) Number of shares or bonds issued

Definition

- For stocks : this is the total number of shares issued by the company.
- For bonds : this is the number of bonds in circulation.
- Not handled for OPCVMs (investment funds) and securities not traded in France.
- For instruments listed in Amsterdam and Paris, this is one of the factors for determining the free float for the instrument (for instruments listed in Brussels, the free float is determined on the basis of the number of shares issued on the market place at the moment of the IPO, or during a subsequent capital increase).
- Calculation of market capitalization
- Checking of open positions on the options market

Permitted Values

Greater than or equal to zero.

- For Brussels and Lisbon greater than the number of listed shares
- For Amsterdam and Paris equal to the number of listed shares
- Changes when rights, attributions etc. are exercised.

It is set to 99 999 999 999 if the amount is over 11 digits (case for Lisbon).

(34) Quantity of shares/bonds traded on previous day

Definition

Total number of shares or bonds exchanged on a given instrument, during the trading day identified by associated data item "Date of last price on instrument", also called "previous trading day". The total allows for the following types of exchange :

- trades executed on the central market,
- trades executed outside the central market.
- This item is entered in the same way for lending stock.

Permitted Values

Unsigned integer

Zero when the instrument has never been traded.

Zero for Luxembourg Cash Market (not available data)

(35) Indicator for instrument in the SRD deferred settlement system

Definition

Indicates whether the instrument has been admitted to the Deferred Settlement System (SRD) and/or to the Euronext NV Securities Lending Market.

Permitted Values

- 0 : Instrument neither eligible for the SRD, nor eligible for the Loan and Lending Market.
- 1 : Instrument eligible for the SRD and for the Loan and Lending Market.
- 2 : Instrument eligible for the SRD but not for the Loan and Lending Market.
- 3 : Instrument eligible for the Loan and Lending Market but not for the SRD.
- 8 : non significant.

(36) Expiration date for lending/borrowing contract

Definition

Represents the inclusive date until which a lending/borrowing contract can be traded.

Permitted Values

YYYYMMDD format.

Takes the value zero if not provided.

Date value entered on creation of stock.

Provided if and only if the instrument is traded on the securities lending market.

(37) Instrument lot size

Definition

Amount, expressed in number of shares or in an amount or a volume of the capital, of the lot size.

The lot size is a minimum tradable quantity that is set for each instrument by Euronext. The quantity of an order entered by a trading member on the market must be a multiple of the lot size.

This number is also called the "Quotité de Marché" (Minimum market tradable quantity).

For bonds, this data has to be considered with the data "**Amount of par value for instrument for calculating trade amount**".

This item is calculated in the following way :

- for Brussels-listed bonds that are quoted in % :

□if $1 \leq \text{market par value} \leq 99\,999\,999$, then the Instrument Lot Size is the integer part of the market nominal (and, moreover, the lot size and the par value for trade amount are set to 1).

- for Amsterdam-listed bonds quoted in % :

□if $1 \leq \text{initial par value} \leq 99\,999\,999$, then the Instrument Lot Size is the integer part of the initial nominal (and, moreover, the lot size and the par value for trade amount are set to 1).

-for Lisbon-listed bonds quoted in % :

□if $1 \leq \text{market par value} \leq 99\,999\,999$, then the Instrument Lot Size is the integer part of the market nominal (and, moreover, the lot size and the par value for trade amount are set to 1).

□if the market par value is not an integer, until 4 decimals (over, the number is rounded to 4 decimals) the Instrument Lot Size is set to an integer multiple of the market par value (and, moreover, the par value for trade amount is set to 1).

In all other cases, the Instrument Lot Size is the item Instrument Lot Size that is provided by PGD-DST (this is a whole number of shares or bonds).

Permitted Values

Note 1 : only positive values are possible.

Note 2 : only integer values that are equal to or greater than one are accepted until Euronext systems have been adapted for using quantities expressed as a par value amount (Decimalization project).

Method of trading for bonds in % :

- For Paris the trade is done for a quantity of shares.

- For Amsterdam and Brussels the trade is done for an amount of the capital equal (or a multiple) of the smallest denomination.
- For Lisbon the trade is done for a volume in € of the capital.

(38) First possible settlement date for instrument

Definition

Represents the first possible settlement date for a given instrument with the instrument's depository.

When this date is not provided, it means that the first possible settlement date is the same as the instrument's flotation date. This item is provided solely for Amsterdam-listed instruments of the type As If and When Issues. In other words, it is provided solely for new issues for which the first settlement date is a considerable length of time in the future, or is still not known even though it is already possible to trade the instrument. As long as the date remains unknown, this is a fictitious date that must be modified as soon as the real date is known. In terms of instrument types, the instrument can be either a bond or a warrant.

This item is determined as follows (according to the FININFO PGD/DST dataflow):

□ If the marketplace = 038 (Amsterdam), then

□ If the instrument is a bond, then the first possible settlement date is the settlement date for the issue price (taken from the Bond Characteristics message) if this item is not set to zero.

□ If the instrument is a warrant, then the first possible settlement date is the settlement date for the issue price (taken from the Warrant Characteristics message) if this item is not set to zero.

In all other cases, this item is not provided.

Used by Euronext NV's C2I® system in the rule for determining the theoretical settlement date for a trade.

Permitted Values

YYYYMMDD format.

20111111 is the date used for Dutch warrants for which the settlement date is unknown at the time the instrument is floated.

Spaces if not provided.

(39) FTSE ID for Economic sub-sector of the Issuing Company

Definition

For an instrument listed : the economic sub-sector of its issuing company, in the system of classification of the Company International FTSE.

For a stock exchange index by economic sector : the economic sub-sector common to all the instruments which compose the sample of this index.

Permitted Values

Not provided for level 1 market index-type instruments (indexes for which the sample comprises all or some of the instruments that belong to an economic group), nor for level 2 market index-type instruments (indexes for which the sample comprises all or some of the instruments that belong to a given sector).

(40) ICB ID for Economic sub-sector of the issuing company

Definition

Identifies :

- For a listed instrument, the economic subsector of the issuing company, in the ICB (Industry Classification Benchmark) classification.

- For a stock exchange index by economic sector : the economic subsector common to all the instruments which compose the sample of this index.

Every issuing company is classified in one and only one subsector, according to the company's primary revenue source. The nomenclature of subsectors is purely economic, and allows an analysis of issuers independent from geopolitical borders. Any subsector belongs to one and only one sector. Any sector belongs to one and only one supersector. Any supersector belongs to one and only one Industry.

Permitted Values

0000: non significant

(41) Bank Identification Code (BIC) of depository/settlement system for instrument**Definition**

Identifies the depository organization for the shares of an instrument, or when the same organization manages several systems, this item identifies the relevant settlement system for settling trades on a given listed security. The ID is allocated by SWIFT, according to the BIC standard (ISO 9362).

Used by Euronext NV's Clearing 21[®] system to determine the relevant system for settling trades in a Brussels-listed instrument (the National Bank of Belgium's X/N system or VIF system), and thus, the time at which the transactions must be sent during the operating day, and the format in which they must be sent.

Permitted Values

Spaces if not provided.

(42) Market Identification code (MIC) of the listed security**Definition**

Identifies the market to which a listed security belongs by its MIC (Market Identification Code).

Permitted Values

Spaces if not provided.

(43) Long ID of the underlying instrument of a warrant**Definition**

Gives the long instrument ID (12 character format) of the underlying listed security of a warrant in the cash instrument reference database (IVAL). When a warrant has more than one associated underlying, IVAL carries over the code for the underlying with the latest exercise period.

Permitted Values

Spaces if not provided.

Provided if and only if the instrument is a warrant.

See appendix §2.4.3

(44) FININFO ID for depository/settlement system for listed instrument (table) (5x)**Definition**

Identifies the possible main depository organizations (max 5) for the shares or bonds for an instrument.

The ID is allocated by FININFO.

Used by Euronext NV's C21[®] system to determine the relevant system for settling trades

Permitted Values

00001 : Euroclear France

00002 : CIK (Belgium)

00003 : NECIGEF (the Netherlands)

00004 : X/N (National Bank of Belgium's system)
00005 : VIF (non-fungible Belgian instruments)
00006 : Euroclear Bank
00007 : NIEC
00008 : Physical
00009 : Euronext Paris non Euroclear France
00010 : Interbolsa
00020 : Clearstream Banking Luxembourg
00000 : no depository organization
Space : non significant

(45) FININFO ID for main depository/settlement system for listed instrument

Definition

Identifies the default (or main) depository organization of the instrument (between the possible 5 depositories registered) used by priority for the settlement (e.g.: multi-listed instruments which have several depositories).

This data has to be treated in consideration of the data "FININFO ID for depository/settlement system for instrument".

Used by Euronext NV's C2I® system to determine the relevant system for settling trades

Permitted Values

00001 : Euroclear France
00002 : CIK (Belgium)
00003 : NECIGEF (the Netherlands)
00004 : X/N (National Bank of Belgium's system)
00005 : VIF (non-fungible Belgian instruments)
00006 : Euroclear Bank
00007 : NIEC
00008 : Physical
00009 : Euronext Paris non Euroclear France
00010 : Interbolsa
00020 : Clearstream Banking Luxembourg
00000 : no depository organization
Space : non significant

(46) Type of corporate event causing order books purge

Definition

Indicates the type of corporate event that has occurred on an instrument on the current day, such as detachment of right, or of coupon.

The data item is automatically calculated by the adjustment application but in case of problem or error, the data item value could be modified manually by the corporate events department, particularly for purging the order book in case of absence of corporate event.

This data has to be treated in consideration of the date of the event included into the header of the message.

Permitted Values

00: no specific event
01: dividend payment in cash or in stocks
02: interest payment (bonds for which the price is not expressed in % of the nominal, only)
04: split
05: bonus (i.e. attribution)
06: subscription

07: share allocation
08: share swap
09: reverse split
10: merger
11: final bond redemption
12: capital amortization
13: Draw announcement (Belgian bonds only)
16: complex corporate event
17: purge of the order book (purge is initiated manually in the absence of a corporate event, e.g. following the modification of the variable tick of the listed security)
